

City of Austin

Digital Services Transformation

Background:

The City of Austin offer residents hundreds upon hundreds of services -- everything from building permits to supplemental food assistance. Since people are increasingly reliant on mobile devices to accomplish their day-to-day tasks, the ability to access these services online has become imperative.

The Digital Services team is rebuilding the City of Austin's website to improve resident access to municipal services.

City of Austin

Digital Services Transformation

Desired Outcomes:

Provide residents, visitors and local businesses with accessible, equitable and coordinated services as means to improve the lives of the people who rely on our services to live their daily lives.

and

Partner with and support frontline staff in their efforts to provide city services.

My Role:

- **Lead, scale & standardize** exploratory and evaluative research
- **Oversee** Service Audit
- **Scale** service improvement to compliment the digital services transformation
- **Orchestrate** collaboration across teams and departments

Starting a Mobile Food Vending Business in the City of Austin and Travis County

The Mobile Food Vending permit allows a business to sell, serve, or give away food and/or drinks to the public from a wheeled unit. Examples of a wheeled unit are auto, trailer, kiosk, or pushcart.

A Mobile Food Vendor may work at many sites within the jurisdiction listed on the Mobile Food Vending permit. Jurisdictions include the City of Austin, unincorporated Travis County, or five other Municipalities contracted with Austin Public Health including: Bee Cave, Sunset Valley, Manor, Lakeway, and Westlake Hills.

The Mobile Food Vending permit does not replace the permit to operate for a Food Enterprise. All Mobile Food Vendors must have a Central Preparation Facility (CPF), which is a fixed food business that provides services to the Mobile Food Vending unit. When a Mobile Food Vendor unit is sold, the permit is non-transferrable and a new application must be completed by the new ownership.

Permit Types

There are two types of Mobile Food Vending permits offered based on the food-handling method.

1. **Unrestricted** Permits are for vendors handling open food and/or drinks inside the mobile unit. Examples include

Improving complex process through service design

MOBILE FOOD VENDORS

This program ensures proper food safety at all mobile food establishments, such as food trailers, motor vehicles, pushcarts, and kiosks.

Applications

- **Permit to Operate:** This approval is required to complete the permitting process. Once approved, the owner will receive a physical permit and permission to operate a Mobile Food Unit.
- **HAACP/Variance:** Use this application to request a variance, allowing your establishment to deviate from the approved standards, and/or submit a Hazard Analysis Critical Control Point (HACCP) plan showing how you will mitigate risks to food safety.

Appointments are required for Mobile Food Vendor physical permitting inspections. View the inspection procedures here. Appointments are for 30 minutes on Tuesdays and Thursdays between 7-45am and 11:00am.

Permit Fee Schedule

View the Fee Schedule for Austin and Travis County effective September 1, 2019, for all permits and services.

Find out if you need a mobile food vendor permit

Anyone who sells food and/or beverages to the public from a mobile unit must have a permit. The category of "mobile units" includes motor vehicles, trailers, bikes, pushcarts/kiosks, and peddlers on foot selling from coolers or hot boxes.

The Texas Food Establishment Rules state the requirements.

Exceptions for the mobile food vendor permit

There are exceptions to the mobile food vendor permit. Under the Hazard Analysis Critical Control Point (HACCP) rules, you can request a variance and submit a plan for how you will protect the public from food safety risks. To request a variance, fill out the HAACP/Variance application.

Contacts and Documents

Mobile food vendor permit type and fees

Guiding residents through complex permitting processes with usability testing.

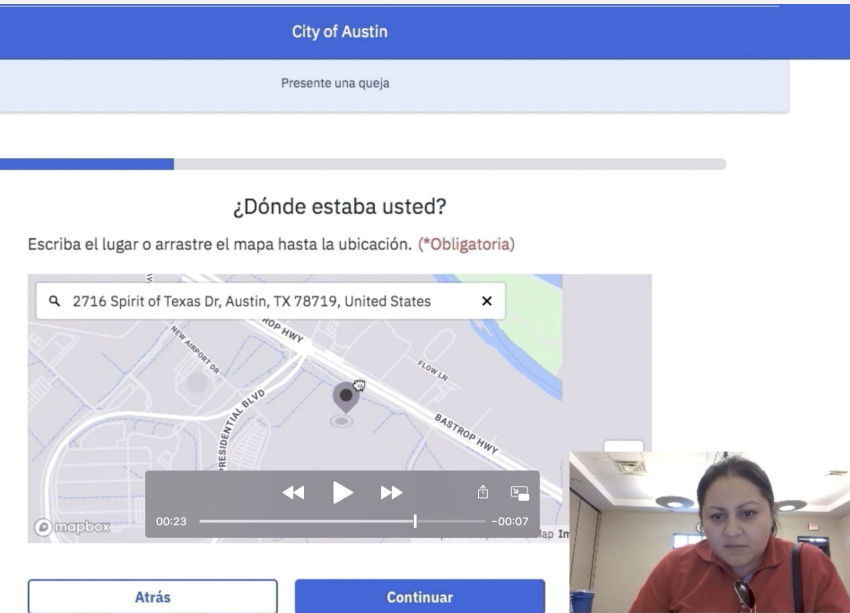

Usability testing a digital guide to complex processes

What we learned

-  Content should be organized by user goal
-  Finding balance between friendly language and documentation
-  Logical content organization trumps search
-  Checklist section was a favorite
-  Documents section was a lifesaver
-  Include an introduction
-  Give contacts their own space
-  Staring is confusing and unhelpful

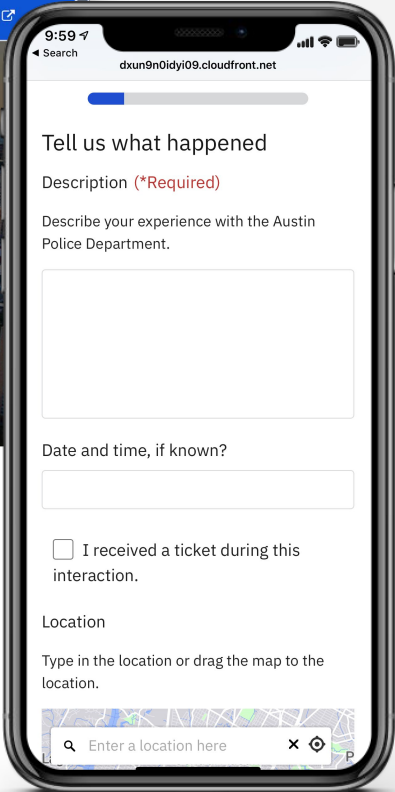

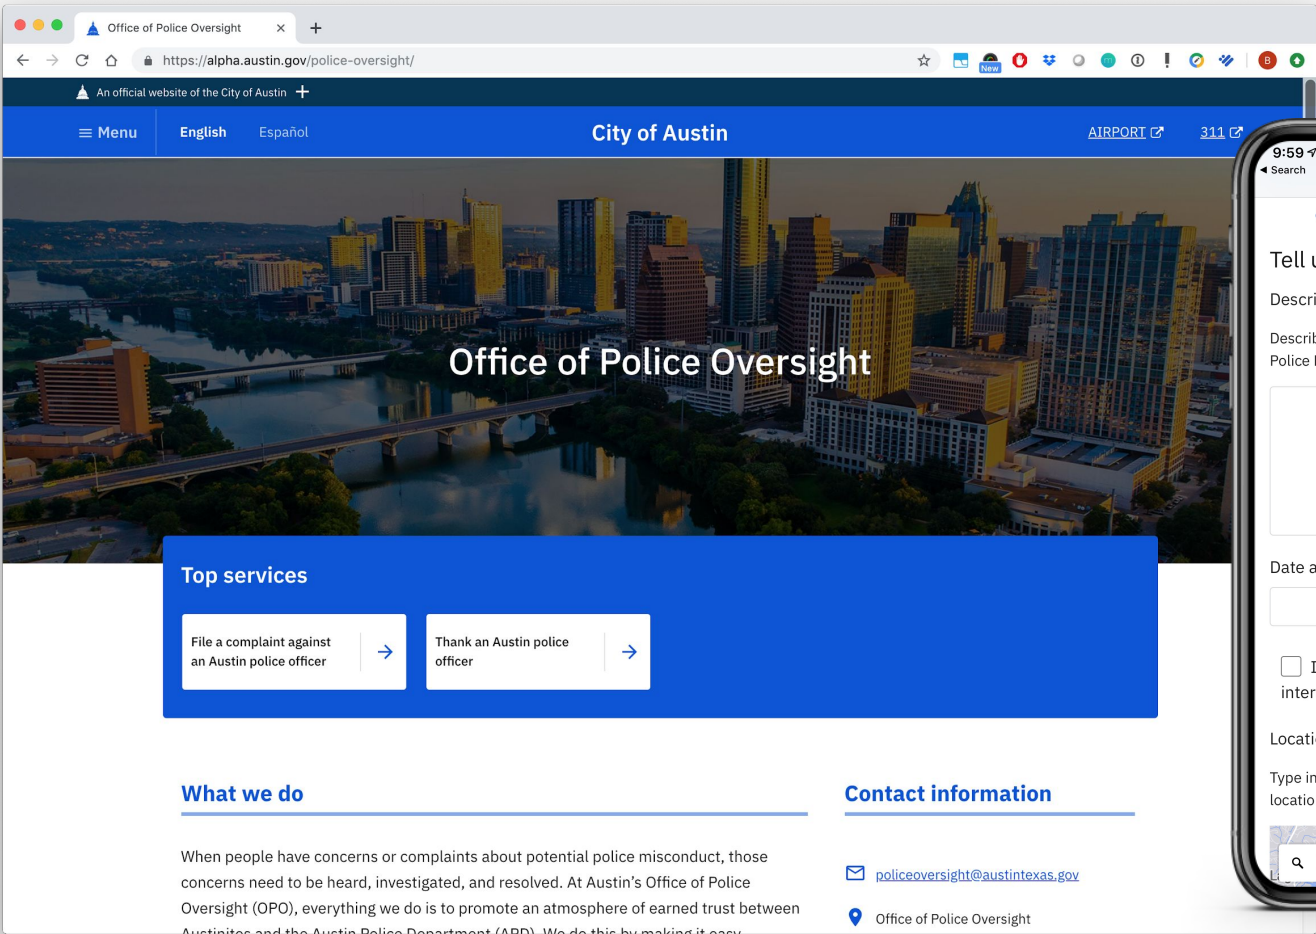

Usability testing complex forms

Promoting equity through usability testing with vulnerable populations

Usability testing complex forms

Process

Evaluating navigation through tree testing

Using mixed method research to evaluate a new navigational structure.
